## Liquip Aviation Product Range - Update

Dear Valued Customers and Distributors,

Liquip having been proudly supporting the Aviation fueling segment for numerous decades. We are pleased to continuously support all customers with our comprehensive range of aviation fueling components.

Liquip manufactures a global range of aviation products whilst supplying high-quality OPW aviation components. Furthermore, we proudly partner and stock products from many worldwide leading brands to offer customers within the Oceania region products for the safe, reliable and cost effective handling and transfer of aviation fuels.

### Products that are available through Liquip include:

- Liquip electronic registers
- Hydrant Pits
- Deadman valves and handles
- Carter ground fueling equipment e.g. pit valves and nozzles
- Pressure vessel fabrication and solutions
- Facet filtration elements and products
- Isoil meters and displays
- PD meters e.g. Sampi and LC
- Bottom valves
- Schultz DP gauges
- Aljac sampling equipment
- Elaflex hose and fittings
- Hosereel and components
- Jet and Avgas selective couplings
- Sampling adaptors
- Loading equipment
